

Bios Life™ Slim | Supports Healthy, Sustained Weight Loss*

Bios Life Slim is a fiber-based drink incorporating the latest available science to help assist the body in losing weight and maintaining healthy blood glucose and cholesterol levels.

Product Information

Taking Bios Life Slim, a scientifically-designed weight management product, in conjunction with exercise and a balanced diet will help you lose weight and improve your life.*

Unicity 7X™ A proprietary blend of polysaccharides that help curb hunger pains and provide a sense of fullness. This helps to reduce caloric intake and subsequently leads to weight loss.*

Biosphere Fiber™ A patented blend of five highly soluble fibers combined with mineral carbonate which quickly forms a fiber matrix in the digestive tract that helps produce a sense of fullness, traps cholesterol and prevents its reabsorption, and aids in weight loss.*

Beta Glucans A fiber that helps to control the lipid and glucose response after a meal. Beta glucans also help stimulate the immune system.

B-vitamin Complex Required by the body for energy production.

Features and Benefits

Bios Life Slim, when taken as directed, helps:

- Weight management*
- Increase satiety (sense of fullness)*
- Lower the glycemic index of food you eat*
- Maintain healthy cholesterol levels*
- Maintain healthy blood sugar levels*
- Improve waist-to-hip ratio*

Item code: 25105

Per Serving: 1 Sachet

Servings Per Box: 60 Sachets

Biosphere Fiber

There are two types of fiber, soluble and insoluble.

Soluble fiber is able to interact with water, forming a gel-like matrix that can trap food. Soluble fiber binds to bile acids in the small intestine and is then passed out of the intestine with other waste products.

Insoluble fiber does not interact with water (it doesn't dissolve in it) and is responsible for the bulking effect of fiber, which helps cleanse the bowel and supports regular bowel movements.

Biosphere Fiber is a blend of five soluble fibers that are able to curb cravings, maintain healthy lipid levels, and help with weight loss.

Guar beans, the source of guar gum, one of the fibers found in Biosphere Fiber.

Bios Life™ Slim

1 Rule | 1 Product | Slim is the Difference!

1 Rule: 4-4-12

Eat breakfast and then wait at least four hours to eat lunch; wait at least another four hours before eating dinner, and then wait at least twelve hours before eating breakfast. Repeat for a slimmer you.

Example of the 4 - 4 - 12 Rule	
Eat Breakfast	Wait at least 4 hours
Eat Lunch	Wait at least 4 hours
Eat Dinner	Wait at least 12 hours to eat breakfast

Many of us feel we are too busy to eat breakfast, and so we skip it. We then eat a large lunch and an even larger dinner. This leads to dramatic blood glucose spikes during meal times which can cause the body to store more food as fat. Boost your metabolism by starting your day with a high-protein, low-carbohydrate breakfast and then eat a balanced lunch and dinner, being careful to avoid high-glycemic foods such as sugar, pasta, white rice, and white flour.

Studies have shown that eating meals on a regular basis (e.g. 4-4-12) is healthier than infrequent meal times. Infrequent meal times may lead to an increase in LDL cholesterol, increase insulin resistance, and may lead to weight gain over time.*

1 Product

Take Bios Life Slim at least twice a day to reach your weight loss goals.*

Slim is the Difference

Numerous centimeters lost, thousands of satisfied customers, and tons of shed kilos are all testimonials to the fact that – Slim really is the difference.*

Frequently Asked Questions

- Q. What does Bios Life Slim do?**
- A. Bios Life Slim contains proprietary ingredients that help to reduce appetite, assist the body with weight loss, and maintain healthy lipid profiles.
- Q. When should I take Bios Life Slim?**
- A. Bios Life Slim should be taken at least twice a day, 10-15 minutes before a meal.
- Q. What is the shelf life for Bios Life Slim?**
- A. Bios Life Slim has a shelf life of 2 years if kept in the original, unopened packet.
- Q. How quickly will I see results with Bios Life Slim?**
- A. It may take a full 90 days to begin to see noticeable results; however, many experience results sooner.
- Q. What stimulants are in Bios Life Slim?**
- A. Bios Life Slim contains no stimulants.
- Q. What are the main ingredients in Bios Life Slim that promote fat loss?**
- A. Biosphere Fiber™ and Unicity 7X™ (proprietary blends).
- Q. Who can take Bios Life Slim?**
- A. Bios Life Slim is derived from natural ingredients so it is safe for all ages, but is recommended for adults who want to lose excess pounds or maintain a healthy weight. Pregnant or lactating women should consult their doctor before taking Bios Life Slim.
- Q. Is Bios Life Slim gluten free?**
- A. Yes. Bios Life Slim is gluten free.

Bios Life™ Slim | Science

What Does Bios Life Slim Do For You?

Assists the Body in Maintaining Healthy Blood Sugar Levels*

The fiber in Bios Life Slim has been found to lower the glycemic index of the food you eat. Fiber is able to slow the absorption of glucose in the intestine, which helps moderate the amount of glucose released into the blood.

Reduces Appetite*

Soluble fiber interacts with water to create a gel-like matrix in the intestinal tract. This matrix takes up the physical space normally taken up by food and helps lead to a sense of fullness. Eating less causes your body to start burning its fat stores instead of using your most recent meal as an energy source.

Aids the Body in Maintaining Healthy Cholesterol Levels*

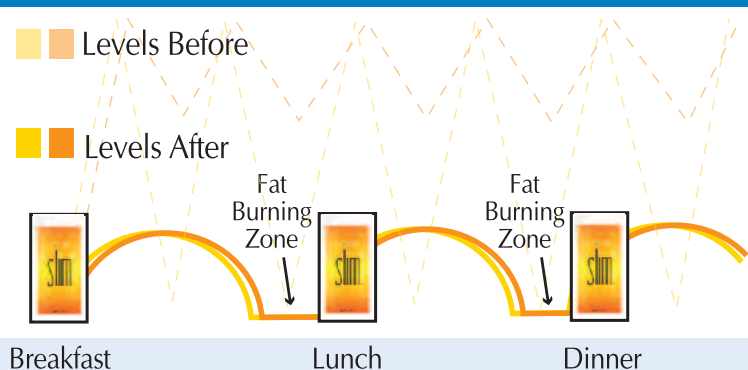

Biosphere Fiber™ helps the body to maintain healthy cholesterol levels. Soluble fiber binds to bile acids in the small intestine and is then passed out of the intestine with other waste products. Since the bile acid is removed, the liver must then take in more cholesterol to synthesize more bile acid.

Increases Lipolysis (the hydrolysis of lipids)*

When insulin is no longer present, your body's fat cells begin to release free fatty acids as a source of energy. As your body uses up the stored free fatty acids, your fat cells get smaller, which is seen as a reduction in body size.

Glucose and Insulin Levels Before and After Taking Slim

1. Slim slows the rate at which food is converted into glucose.
2. This causes less insulin to be produced.
3. Glucose level and insulin level drop together.
4. With insulin gone, fat cells release free fatty acids to feed cells.
5. The body begins to store less fat and burn more, creating a "Fat Burning Zone" between meals.
